    - MFA - one time
    - Token - one time
  - Reactive Streams

## Design Issues

### DI 20190529-1: Run terraform apply in headless mode - no region or approval prompts

Terraform apply asks for the region - need to supply these as ideally an environment specific override.

```
# before
obrienbiometrics:terraform michaelobrien$ terraform apply
provider.aws.region
  Enter a value: us-east-1
Do you want to perform these actions?
  Enter a value: yes
```

#### Option 1:

## Technology

### AWS

### Terraform

### Security

#### MFA - one time

#### Token - one time

### Reactive Streams

<https://github.com/reactive-streams/reactive-streams-jvm#reactive-streams> used in <https://docs.spring.io/spring-framework/docs/5.0.0.M1/spring-framework-reference/html/web-reactive.html> and how they work with [Angular](#) or [ReactJS](#).
